BLM 800VGP

A new range of CNC tube bending machines
for diameters up to 80mm.
Innovations to compete...

Here are just a few of the many advantages incorporated
in this new range:

- increased axis speed and controllability has reduced cycle times by up to 15%
- fully servo-controlled pressure die has reduced changeover time and simplified setting
- vgp 3D graphical programming software with real-time automatic simulation of the working cycle and the component
- pc based cnc with touch screen monitor and data storage of all programmes and respective machine settings
- connection for tele-modem link for remote fault diagnostics and repair

Our technical sales staff is at your complete disposal for further information or to arrange a demonstration. Contact BLM tel. +39 031 7070200 • e-mail: export@blm.it • www.blmgroup.com
