

 **ADIGE**

a BLMGROUP Company

LASERTUBE, NEW APPLICATIONS

- **DEVELOPPING NEW PRODUCTS WITH REDUCED COSTS**
Using ADIGE Lasertube systems and tubes as well as open profiles you can develop new products reducing relevant production costs
- **USING TUBES AND OPEN PROFILES INSTEAD OF SHEET**
You can joint components studied for laser cutting avoiding all typical sheet metal processes i.e. cutting, trimming, bending, welding, etc.
- **INCREASING QUALITY**
Due to better quality, the resulting joints no longer require welding jigs, have a high quality finish combined with increased rigidity, and reduce the number of usually required components

Our staff is at your disposal for any clarification, information and/or practical demonstration. Contact:
