NEW FACTORY EXPANDS INNOVATION CAPABILITY

On July 25, 2007, two important events took place in Levico Terme:

- **ADIGE** opened a new office building
- **ADIGE-SYS** laid the foundation stone of its new factory

The new three storey office block at ADIGE increases the present office floor area by 1500 square metres. It will mainly house the ever-expanding research and development department, whose growth ensures ADIGE maintains its technology lead and competitive edge. There are also additional new rooms dedicated for customer meetings, customer training and software demonstrations.

On the same day as the opening of the new office, ADIGE-SYS laid the foundation stone for their new production factory. At present ADIGE-SYS are located in Novaledo(TN). The new factory will be alongside ADIGE in Levico. This move will increase efficiency and productivity to satisfy increasing market demands.
