# ARTUBE

NEW SOFTWARE TO DESIGN, PLAN AND MANAGE THE PRODUCTION OF TUBULAR PIECES ON LASERTUBE MACHINES.

- **.STEP**, **.IGES** and **.XT** files can be imported, modified and **CAM** processed without having to redesign the piece from scratch;
- management of **special or particularly complex sections** so that unusual sections can also be cut;
- automatic application of the **best cutting parameters** to guarantee high performance and production efficiency at all times;
- automatic generation of the **cutting strategies** to optimize the cutting process and the related cycle time;
- creation of cutting programs for **open profiles and not only tubes**.

Our staff is at your disposal for any clarification, information and/or practical demonstration.
